

FleetFocus™

RENTAL

A complete solution for
asset rental and daily
hire vehicles

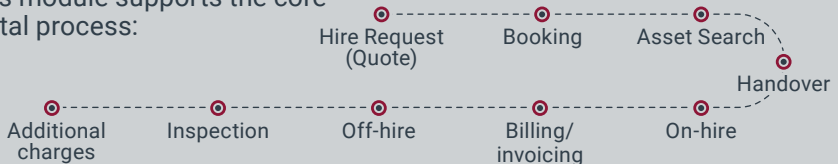

AssetWorks Rental is an integrated, real-time module that manages all aspects of the rental process. The module is designed for fleet organisations that need to manage the short-term and long-term hire of vehicles and ancillary equipment. Rental supports multiple locations and includes the same flexible charging facilities already available within the FleetFocus suite.

Features:

- Request Register of rental vehicles, base depots, and other user-defined characteristics
- Flexible search of suitable rental asset categories and types
- Unlimited number of rental products (hourly, daily, weekly, monthly)
- Customer-specific master contract agreements
- Integrated billing and invoicing
- Ability to charge for ancillary usage, mileage, and additional services
- Automatic implementation of customer license inspection conditions
- Full support for inwards and back-to-back rentals

This module supports the core rental process:
