

SMARTAPPS

Mobilise your fleet
operations

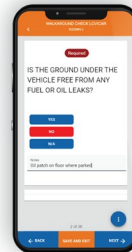

Today, it is vital for drivers, operators, and other fleet professionals to be able to complete tasks while on-the-go, including performing inspections, entering service requests, updating meter readings, and viewing upcoming work. SmartApps are designed to be quick, easy, and highly mobile for roles across the fleet organisation. Each application in the suite was designed to allow fleet customers to go about their daily tasks with the convenience of mobile technology and the power of FleetFocus.

The SmartApps are included as a part of the MobileFocus Enterprise suite.

Key Features:

- **Available on any mobile device**
 - Smartphone and tablets
- **Fully connected**
 - Works wherever Wi-Fi or data is available
- **Integrated with FleetFocus**
 - All data is automatically integrated with FleetFocus

? Do you need more flexibility
with integrations?

? Is your team able to maintain
integrations independently?
