

REPORTING TOOLS IN FLEETFOCUS

Fleet managers need access to comprehensive data and actionable insights to streamline operations, optimise resources, and drive business growth. Enter FleetFocus—the all-encompassing fleet management solution equipped with robust reporting tools designed to empower fleet managers with the information they need to excel.

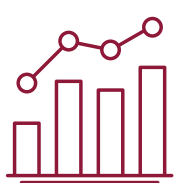

Crystal Reports: Invaluable Fleet Insights

Powered by the robust Crystal Reports/Business Objects engine, FleetFocus offers over 270 standard reports covering every facet of fleet operations. These reports, ranging from maintenance schedules to fuel consumption analysis, equip managers with actionable insights to drive data-driven decisions. With the flexibility to export reports in multiple formats, including Microsoft Excel and Adobe PDF, collaboration and alignment among teams are effortlessly facilitated.

KPI & OPM Dashboard: Instant Performance Insights

Real-time visibility into key performance indicators (KPIs) is indispensable for effective fleet management. FleetFocus's dedicated KPI & OPM Dashboard module provides graphical representations of KPI results in real time. Managers can customise dashboards to focus on specific areas, such as locations or departments, gaining immediate insights into fleet performance. Whether monitoring vehicle utilisation rates or tracking maintenance costs, these dashboards offer the agility needed to adapt to evolving circumstances and drive continuous improvement.

Ad-Hoc Reporting: Tailored Insights on Demand

Seamlessly integrated into the FleetFocus application, this module empowers users to create custom reports tailored to their specific needs—without the need for external database access. Whether it's analysing vehicle downtime or evaluating driver performance, users can extract meaningful insights with ease. With the ability to export reports in popular formats like Microsoft Excel and Adobe PDF, sharing insights across the organisation is seamless, facilitating informed decision-making.
